THEERTHINIEMATHI V

+91 9384793343 | theerthiniemathiv@gmail.com | linkedin.com/in/theerthiniemathi-v-834101439

SUMMARY

Final-year B.Tech Computer Science student (9.47 CGPA) with hands-on experience in Python, SQL, REST API integration, Excel and generative AI through internships, Forage job simulations and team projects. Built an AI-powered trip planner using API-based services, and analysed business datasets in a GenAI-focused analytics simulation. Strong written communication, structured thinking and attention to detail, with a keen interest in implementing AI solutions for real clients.

EDUCATION

B.Tech Computer Science and Engineering – 9.47 CGPA | July 2023 – July 2027
Hindustan Institute of Technology and Science, Chennai

High School – PCM + Computer Science | May 2023
Vidhya Sagar Global School, Chengalpattu

SKILLS

Programming Languages: Python, SQL, Java (Basic)

APIs & Integration: REST APIs, API Integration, JSON, API Headers & Authentication, Flask, HTML, CSS, JavaScript

Generative AI & ML: Generative AI Fundamentals, LLMs (ChatGPT, Claude), Prompt Writing, Machine Learning Fundamentals, Classification Models, Predictive Modelling, Data Preprocessing, Model Evaluation

Voice AI & Implementation: Voice Agent System Prompts, Knowledge Base Creation from Client Documents, Webhooks, Telephony Setup, Client Requirement Tracking & Call Notes

Data & Tools: Microsoft Excel, Google Sheets, MySQL, Pandas, NumPy, Scikit-learn, Tableau, Power BI, Google Colab

Software Practices: Application Development, Software Testing, Debugging, Documentation

Core Competencies: Problem-Solving, Analytical Thinking, Communication, Leadership, Team Collaboration, Quick Learner

PROFESSIONAL EXPERIENCE

Data Analytics – Deloitte (Forage) | September 2026
- Analysed 160,704 IoT telemetry records across 4 factories and 9 device types using Tableau and Excel, building 2 charts and 1 interactive dashboard to pinpoint Seiko's 80-hour downtime.
- Ran a forensic pay-equity audit of 37 job-role combinations, flagging 7 Highly Discriminatory roles across 3 factories with gaps of up to 26 points.

GenAI Powered Data Analytics – Tata Group (Forage) | May 2026
- Cleaned and analysed a 500-record business dataset across 4 simulation tasks, achieving 98% data cleaning, resolving 89% of missing values and 92% of duplicates.
- Performed EDA and built dashboards to surface trends and support data-driven decisions.

Data Science Intern – CodSoft | June 2025
- Built and evaluated 2 ML classification models in Python: a Logistic Regression Titanic survival predictor (95% accuracy, 891 records, 11 features) and a KNN Iris species classifier (97% accuracy, 150 records, 3 classes).
- Handled data preprocessing, feature analysis, training and evaluation.

Web Development Intern – CodSoft | July 2024
- Assisted in website development using HTML, CSS and JavaScript; performed web application testing and bug fixing.
- Improved website usability and resolved user interface issues.

Data Visualization – Tata Group (Forage) | July 2024
- Analysed a 541,909-record business dataset and built 1 dashboard with 8 visualizations tracking 8+ KPIs, completing the simulation at 100%.

PROJECTS

CareerLens: AI-Powered Skill Demand Forecasting and Career Intelligence Platform | August 2026
- Led a team of 4 to build a Python (SQL, Google Colab) platform that processed 50+ resumes and 1,000+ job postings, extracting skills from a 100+ skill dictionary and matching candidates to 20+ job roles.
- Delivered 6 core features and 3 Tableau/Power BI dashboards for career insights and skill-demand forecasts.

Triplingo: AI-Powered Trip Planner | February 2026
- Developed an AI-powered trip planning application that generates personalised travel recommendations and itineraries based on user preferences.
- Integrated API-based services and application logic to deliver dynamic recommendations.

Lost and Found Information System | November 2025
- Collaborated with a team to develop and present a web-based system for reporting, searching and managing lost and found items, with user-friendly features for item tracking and retrieval.

Airlines Performance Analytics Dashboard | February 2025
- Led a team of 3 to analyse 500+ flight records and 10+ features, building 2 dashboards with 8+ charts and KPIs and a classification model with 97.5% accuracy that uncovered delay patterns by airline, route, cause and time of day.

ACHIEVEMENTS & ACTIVITIES

- Best Project Certificate – IET Industry Summit
- Maintained a 9.82 SGPA; top performer in 3rd and 4th semesters
- Participated in Smart India Hackathon (SIH) 2024 and Umagine; department cultural coordinator; NSS volunteer; college event volunteer
