PROFESSIONAL SUMMARY

Aspiring Software Engineer with hands-on experience in software development, Python, SQL, Web technologies, Machine learning, and Data analytics through internships and real-world projects. Strong foundation in problem-solving, programming fundamentals, database concepts, and application development, with a passion for building scalable solutions and learning emerging technologies.

EDUCATION

B.Tech Computer Science and Engineering – 9.47 CGPA July 2023 - July 2027
Hindustan Institute of Technology and Science, Chennai

High School – PCM + Computer Science May 2023
Vidhya Sagar Global School, Chengalpattu

SKILLS

Programming Languages: Python, Java.
Web Technologies: HTML, CSS, JavaScript, Flask, REST APIs.
Database: MySQL, SQL, DBMS, CRUD, Joins, Subqueries.
Core CS: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks.
AI & Machine Learning: Machine learning fundamentals, Classification Models, Predictive Modelling, Data Preprocessing, Model Evaluation.
Data Analytics: Exploratory Data Analysis (EDA), Data Visualization, Dashboard Development, Excel, Tableau, Power BI
Software Engineering: Software Testing, Debugging, Git/GitHub, Agile Methodologies.
Core Competencies: Problem-Solving, Analytical thinking, Communication, Leadership, Quick Learner.

PROFESSIONAL EXPERIENCE

Data Analytics – Deloitte (Forage) September 2026
Analyzed 160,704 IoT telemetry records across 4 factories and 9 device types in Tableau and Excel (2 charts, 1 interactive dashboard) to pinpoint Seiko's 80-hour downtime, and ran a forensic pay-equity audit of 37 job-role combinations that flagged 7 Highly Discriminatory roles across 3 factories, with gaps of up to 26 points

GenAI Powered Data Analytics - Tata Group (Forage) May 2026
Cleaned and analyzed a 500-record business dataset across 4 simulation tasks, achieving 98% data cleaning, resolving 89% of missing values and 92% of duplicates, then performing EDA and building dashboards to surface trends and support data-driven decisions

Data Science Intern – CodSoft June 2025
Built and evaluated 2 machine learning classification models in Python: a Logistic Regression Titanic survival predictor (95% accuracy, 891 records, 11 features) and a KNN Iris species classifier (97% accuracy, 150 records, 3 classes), after data preprocessing and feature analysis.

Web Development Intern – Codsoft July 2024
Assisted in website development, performed web application testing and bug fixing, and improved website usability. Worked with HTML, CSS, and JavaScript to support web development tasks and resolve user interface issues.

PROJECTS

CareerLens: AI-Powered Skill Demand Forecasting and Career Intelligence Platform August 2026
Led a team of 4 to build a data analytics platform in Python (SQL, Google Colab) that processed 50+ resumes and 1,000+ job postings, extracting skills from a 100+ skill dictionary, matching candidates to 20+ job roles, and delivering 6 core features and 3 Tableau/Power BI dashboards for career insights and skill-demand forecasts.

Triplingo: AI-Powered Trip Planner February 2026
Developed an AI-powered trip planning application that generates personalized travel recommendations and itineraries based on user preferences. Integrated API-based services and application logic to deliver dynamic recommendations and streamline the trip-planning experience.

Airlines Performance Analytics Dashboard February 2025
Led a team of 3 to apply data analytics (EDA, visualization and predictive modeling) to 500+ flight records and 10+ features, building 2 dashboards with 8+ charts and KPIs and a classification model with 97.5% accuracy that uncovered delay patterns by airline, route, cause and time of day.
